

Jana Kruse | Analyst

Climate neutrality - Nature-based solutions - Compensation

Jana Kruse supports Hamburg Institut in the areas of climate neutrality, nature-based solutions and compensation. She is currently studying biology with a focus on biodiversity, ecology and evolution in her Master's degree at the University of Hamburg, where she is particularly concerned with the topics of nature conservation and ecosystem analyses.

During her bachelor's degree, Jana Kruse already gained experience as a working student at the company HanseClimbing GmbH and as a student assistant.

Consultancy and research focus

- Climate neutrality
- Offsetting
- Nature-based solutions
- Greenhouse gas balancing
