

## Karina Queisser | Senior Consultant

Verification systems – Certification – Green electricity

Karina Queisser specialises in the areas of verification systems, certification and green electricity. As part of various research and consultancy projects, the senior consultant is working on the foundations for Guarantees of Origin (HKN) systems for renewable gases as well as renewable heating and cooling and is involved in a market analysis on the subject of green electricity.

Before joining Hamburg Institut, the food scientist worked as an audit manager for a large food manufacturer, where she was deputy head of central quality management. Prior to this, Karina Queisser also gained experience in the areas of food law and process technology.

### Consulting and research focus

- Verification systems for renewable energies
- Green electricity
- Certification
