

Maja Overberg | Junior Project Engineer

Heat planning

Maja Overberg supports Hamburg Institut in the area of heat planning. She is currently studying Energy and Environmental Management in the Master's programme at the European University of Flensburg.

Before joining the Hamburg Institute, Maja Overberg gained experience as a student trainee in the field of technical management of wind farms at BayWa r.e. During her bachelor's degree in energy engineering, she also completed an internship at the German Aerospace Center in the department of solar power plant technology, where she dealt with concentrating solar thermal energy, among other things.

Consultancy and research focus

- Heat planning

Qualification and career

Since 2023	Junior Project Engineer at Hamburg Institut
Since 2022	M. Eng. Energy and Environmental Management , Europa-Universität Flensburg
2022 – 2023	Working student in the field of technical management of wind parks, BayWa r.e.
2021 – 2022	Intern , Department solar power plant technology, Deutsches Zentrum für Luft- und Raumfahrt
2018 – 2022	B. Eng. Energy Engineering , Hochschule Flensburg
