

Moritz Metzler | Analyst

Heat planning – Climate policy

Moritz Metzler mainly works in the fields of heat planning and environmental policy at Hamburg Institut. He is currently studying Geography: Resource Analysis and Management in the Master's programme at the University of Göttingen. His main focus is on global environmental change, resource conflicts and climate adaptation.

During his Bachelor's and Master's studies, Moritz Metzler has already worked as a student assistant, working student and project assistant in various areas. As part of an internship at BUND Landesverband Hessen, he worked on a campaign on the topic of combined heat and power generation.
